## Greetings and Welcome to our 15<sup>th</sup> James Creek Simmental Private Treaty Bull Sale!

It is time to present our sale cattle for your appraisal. Please let us know your questions about the cattle listed and our sale process. We are very impressed with several of the bulls that have developed into great herd bull prospects. You are welcome to stop by and see the bulls and heifers before the sale. As a friend told me, trying to breed the next genetic master piece is why we do this. We encourage you to take a few minutes to study the feedlot page. We are more confident each year in the ability our genetics to make you money in a feeding scenario. Buy with confidence as these bulls and females are herd mates to the same steers and heifers that have produced the efficient feedlot performance!

The bulls and heifers were given Bovi-Shield 5 and 7-way with haemophilus in May before going to pasture. The same vaccinations were given in September before weaning. Bovi-Shield 5 was boosted after weaning, in October. We de-wormed the bulls with Safe-Guard pellets in November.

The bulls and heifers were weaned on September 21, 2017. They are on a TMR that consists of whole corn, dry distillers, grass hay, beet pulp and a mineral supplement. This ration is balanced to a 14% protein level and has been worked up to an energy level of .52 net energy gain. These rations have worked really well for us the past few years and the bulls have gone on feed very easy.

We have included some information that we are tracking for our own use. Using the cow's weight at weaning time we can determine the calf's performance against the cow's weight for birth weight and weaning weight. These are expressed as a percentage of the cow's weight and are located on the individual bull page. The weights used are the actual weights taken on September 26, preg checking and vaccination time. Our herd average the last several years is 6-7% for birth weight and 43% for weaning weight. We have included days of gestation (DOG) on the bulls that were A.I.'ed or had breeding dates. We feel that 288 days gestation hits our herd fairly accurate over time for 'normal' due dates.

On January 2, 2018 weights, frame score and scrotal measurements were taken. The frame score and scrotal measurements are listed as an adjusted number to one-year of age.

Check our website for performance updates of the bulls. We will have another set of weights around January 29, 2018. All of the bulls are dilution tested and the results will be available later in January.

Come early and have lunch with us starting at noon! Hanna and Hailey will have their special Simmental cow cookies. We hope to visit with you soon!

*Heathe, Holly, Hanna and Hailey Widicker*

— ET bull that has all the bells and whistles with a little bit of chrome, power, muscle and easy doing kind. Genetically built for maternal traits. Smithbilt Molson has left a positive mark with other bulls in breed. His dam, 244A by DBD Thunder, is a real gem to see. Cow families are stacked top to bottom with her. Full Fleckvieh.

### FEEDLOT & CARCASS PERFORMANCE

We have been finishing our calves for 20 years. Listed here is the last five years of data and average. All calves are sired by Fleckvieh bulls.

	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>2016</u>	<u>6 Yr. Avg.</u>
Average Daily Gain	3.11	3.34	3.37	3.65	3.97	3.52
Live Weight	1361 lbs.	1268 lbs.	1320 lbs.	1357 lbs.	1295 lbs.	1335 lbs.
Choice	55%	40%	62%	93%	94%	69%
Yield Grade 1 & 2	93%	98%	97%	95%	100%	97%
Average Rib Eye (sq. in.)	15.67	14.95	15.37	15.76	14.62	15.36
Dressing Yield %	63%	62.4%	63%	63%	62%	63.68%
Dry Matter Conversion	5.61	5.21	6.2	5.48	5.79	5.66

I encourage you to finish a few calves to get your feet wet. Consider the genetic improvement that you are striving for in your cattle operation. Today's Fleckvieh bulls give you the genetics to produce highly efficient and productive cattle to work with your environment.

Our calves are fed at Kansas Feedyard, Scott City, KS. The data above is from that environment. Our environment in ND is vastly different and we see these same efficiencies with our cow condition and production traits.

Would you like to capture more dollars from your genetics or give it away to someone else? Give this a try. If you have questions about how we do this give me a call. I'd be glad to visit about this with you.

THANK YOU  
FOR YOUR INTEREST  
IN OUR *Program!*
